

Climate Heroes: Where is the lost formula?

Dear student,

fine, that you decided to play **Climate Heroes: Where is the lost formula?** You will learn about climate change and forests and maybe become a climate hero yourself.

Card and game instructions may be printed double-sided.
Alternatively, game instructions can be handed out and collected again afterwards.

Each team receives a card (see below, possibly with a clipboard), a pen and a mobile device (smartphone or tablet) with the Locandy App installed.

You need WIFI only for the following 3 steps:

- 1) Open the app and click ‚SUCHEN‘ in the lower left corner.
- 2) Select ‚LOCANDY QR-CODE SCANNEN ...‘.
- 3) Scan the QR code on the card (see below) and download the game by clicking the ‚INSTALL‘ - button.

1. Search

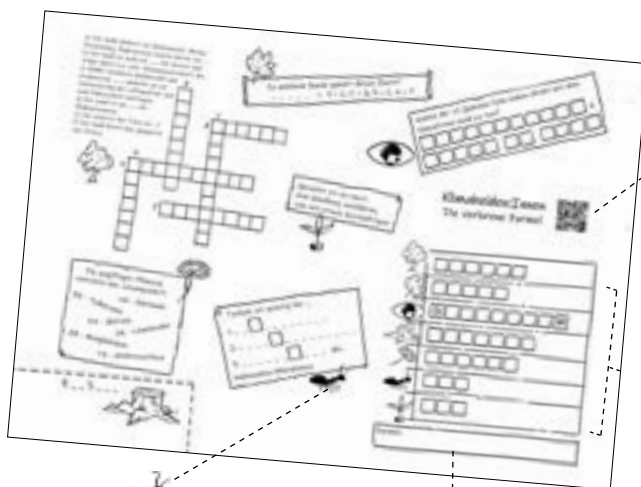

2. Scan QR-Code

Click on the „START“ button and scan the QR code „The Formula“ (on the card or at the 1st station).

Then follow the instructions and directions you get via the App - be patient: read the texts carefully, listen to the audios and watch the videos until the end. Try to keep distance to other teams, so you won't disturb others when listening to the audios.

You will visit a total of 9 stations. Apart from the 1st and the last stations, you are free to choose the order.

Each station is marked with a symbol (e.g. an ant) and can be opened via the Locandy app by scanning the respective QR code. At each station there are riddles to solve / tasks to complete. Solutions are entered partly in the „map“ and/or in the app! The ‚card‘ is the sheet you fill in solutions. It looks like this:

QR-Code to enter the game
(alternatively: QR-Code Station „The formula“)

enter the solution words here

each **station** has a specific symbol
(e.g. an ANT)

note the formula (at the end)
