

- a) The forest is a for water and thus contributes to flood protection, among other things.
- b) Forests store and produce OXYGEN. They therefore help to improve the air quality and protect the climate.
- c) Forests the soil from eroding.
- d) For animals, the forest is a
- e) In forests, humans can from stress.
- f) The forest protects the surroundings against floods, mudslides, falling rocks, soil erosion and during the winter against

Which tree does this leaf belong to?
 -----> M = F, 2 = 3, 5 = 2, P = R

Which of the 17 global goals are directly related to protecting forests?
 [3] [] [] [8] [] [5] [7] [] [] [1] [] [2] []
 [] [] [] [4] [] [] [] [] [] [] [] []
 (C = G, D = H, M = R)

A word for to perform an action, to be actively engaged in something.

Climate Heroes
 Where is the lost formula?

The non-poisonous plants will give you the answer!

AB - deadly nightshade
 NG - goutweed
 THI - dandelion
 ELP - autumn crocus
 DE - lily of the valley
 NKI - wild garlic

Deadwood is important for:
 1. ----- [4] -----
 2. [2] -----
 3. [6] [3] ----- [5] ----- of the [7] -----
 soil [1] -----
